

# CONSERVATORY

## ROOFS

Modern conservatory roofs can transform the style of a conservatory inside and out.

A new roof will enable greater control over the temperature, keeping the space cooler in the summer and warmer in the winter.

### SOLID ROOF

A solid roof is ideal for creating a contemporary look. Thermally efficient and solar reflective modern glazing for superb temperature control.

Light where you need it

Insulated lightweight roof panels

Stylish lighting options

### GLASS ROOF

When light is essential, it can flood in. Tinted, solar reflective glass, allows for effective temperature control all year round.

Up to 80% Solar heat rejection

Coated glass retains heat from within

Self cleaning glass

### TILED ROOF

The lightweight tile is suitable for most existing frames as part of a roofing system that provides an insulated ceiling, with a stylish finish. This solution is a quick and cost effective alternative to a traditional extension.

Bespoke design

Energy efficient

Quick installation
