

FOR ALL YOUR
HOME IMPROVEMENTS

WHY CHOOSE APPLE?

From humble beginnings back in 1998 Apple has grown as a family business with traditional values focusing on quality products and customer service and is now one of the leading, trusted, multi-award winning home improvement companies in the UK.

Don't move, improve with Apple.

If you are considering replacement windows, doors or roofline, or need extra space in which to relax, new electrical heating, perhaps extra security or maybe a fresh, stylish look to your home with modern weatherboard cladding, then there is no better place to begin than with Apple.

From traditional casement windows to spacious breathtaking conservatory installations and extensions; Apple have the finest PVC-u products in the UK that can really make the difference to your lifestyle.

Pride is an installation built to stand the test of time. Apple's unique formulation is made to last decades, not just years, imagine an installation that stays looking young and fresh while your garden and home evolve around and it, an installation that enhances the natural character of its surroundings becoming part of a larger scheme, yet bringing its own individuality.

Apple believe in good design and if design has rules, one of its fundamental ones is suitability. Any home improvement that we supply is designed with adaptability in mind.

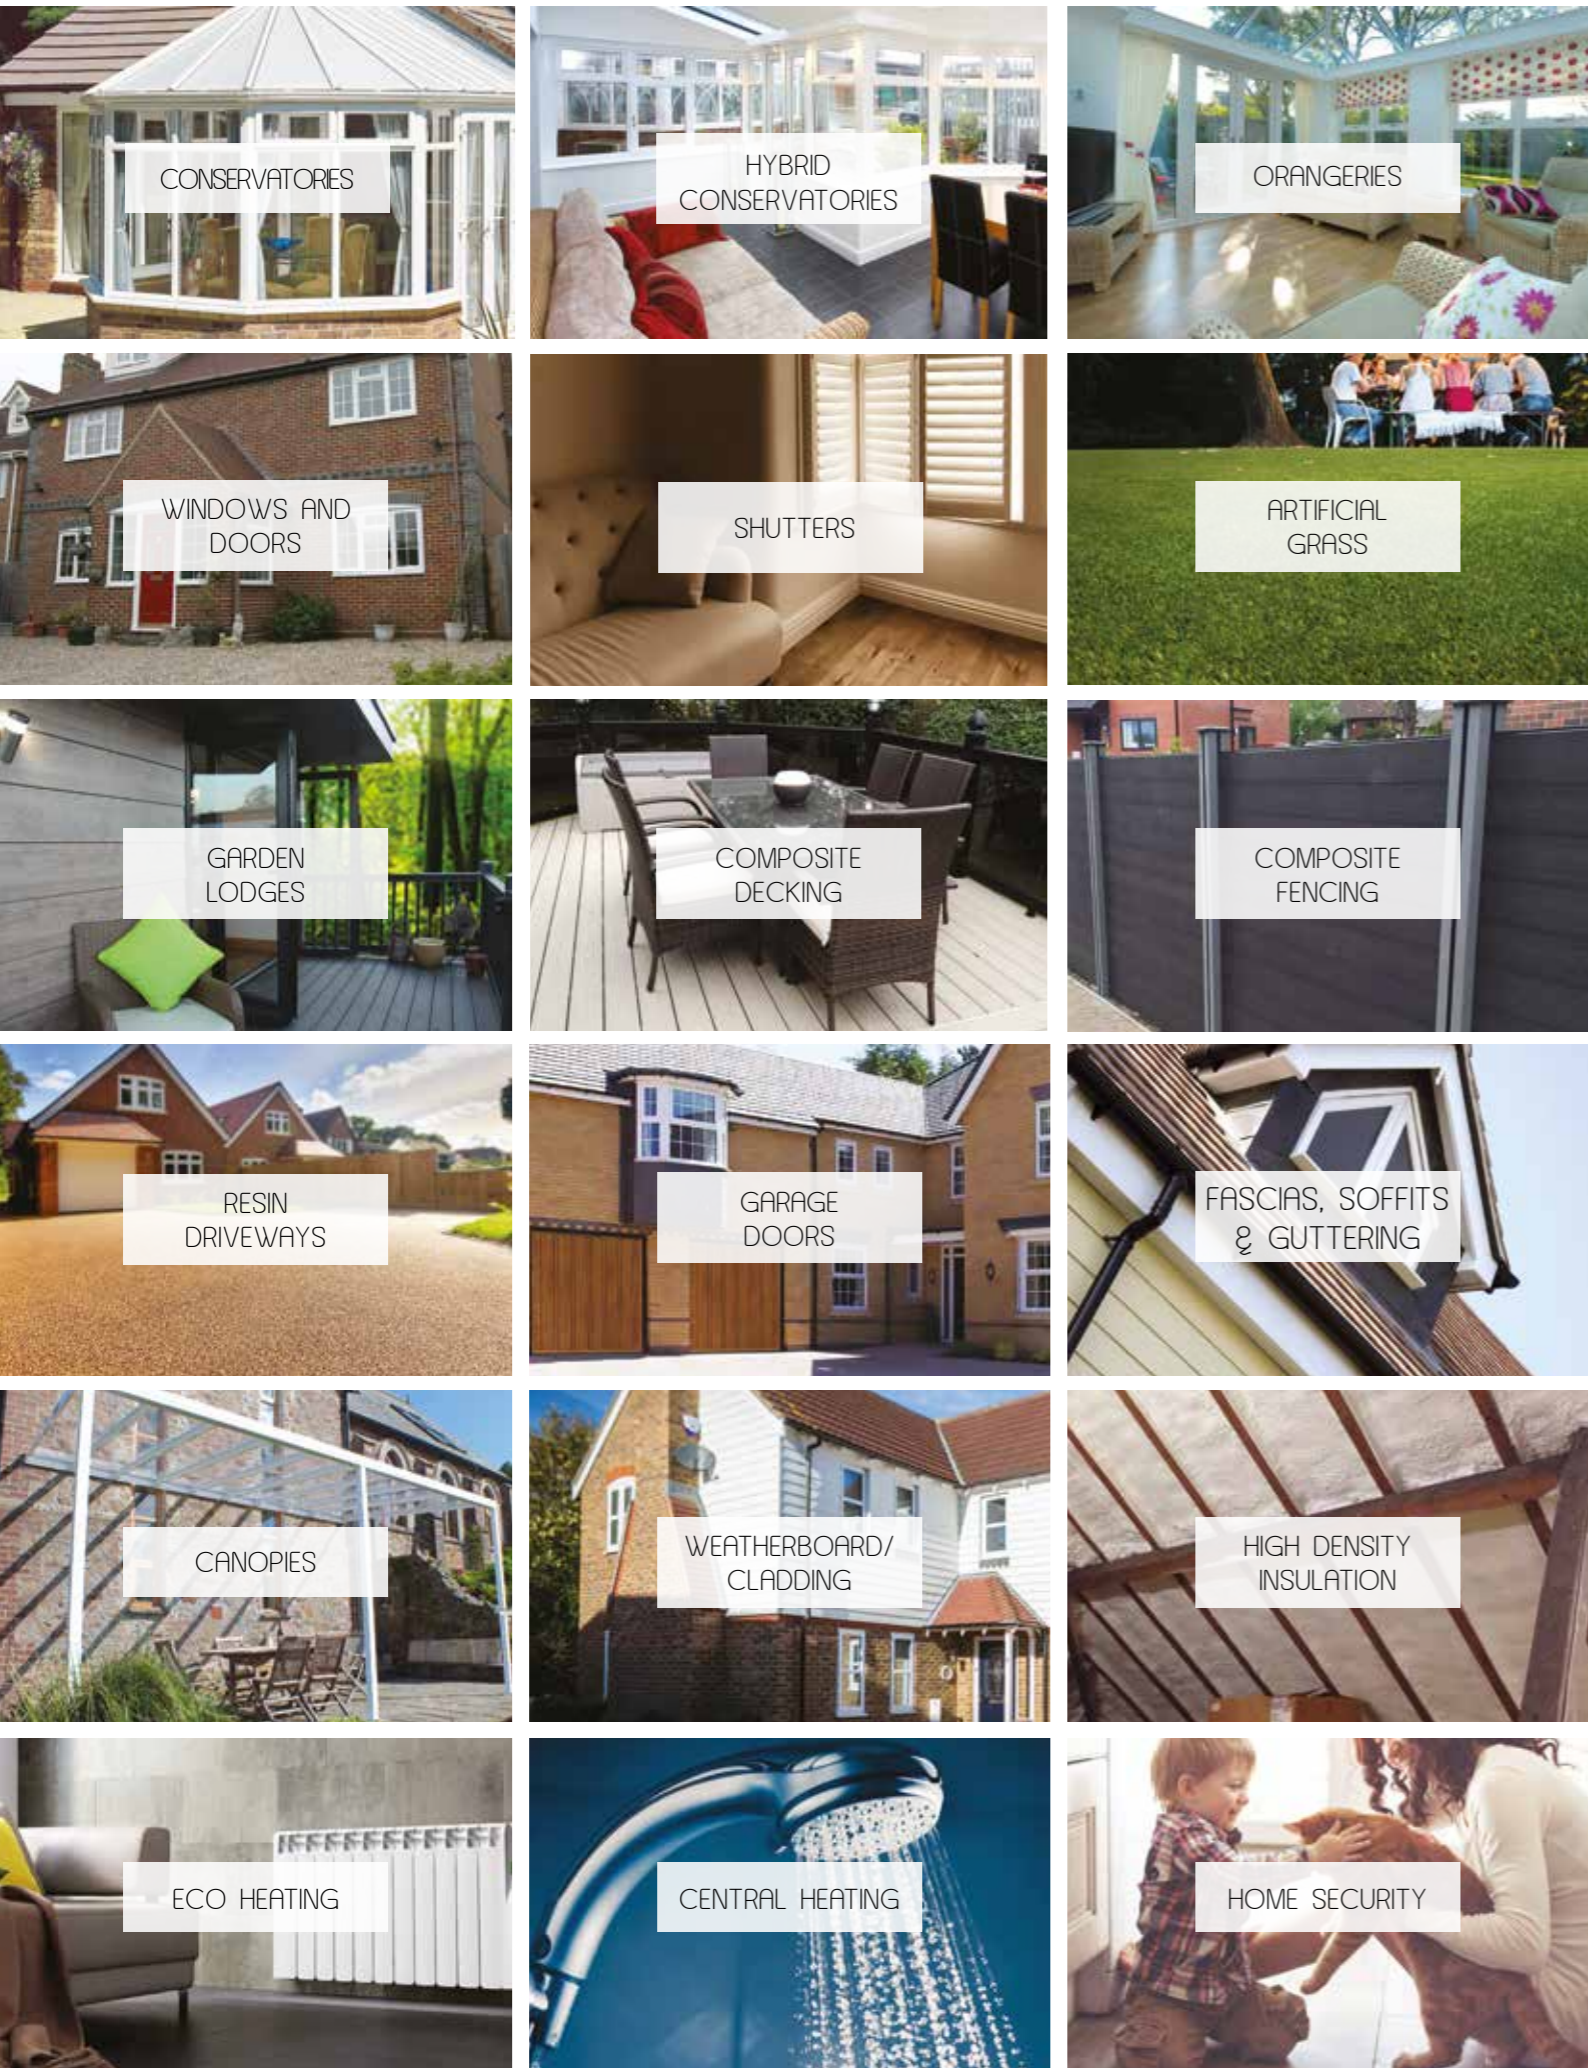

At Apple we build our installations to enhance your home and provide the 'wow' factor. We hope to help your home evolve into something brighter and more enjoyable.

It's not just about adding something impressive to your house, it's about improving your whole living space.

BEAUTIFUL NEW CONSERVATORIES

SEE PAGE 64 FOR CONSERVATORY ELECTRIC HEATING SOLUTIONS

GEORGIAN STYLE

Our Georgian conservatories are true to the symmetry and boldness of the architectural style from the period, flat faced with a square or rectangular shaped layout, typically constructed with a high sloping roof giving an impressive vaulted effect that is in keeping with traditional grandiose and luxurious design.

The symmetrical layout allows for variety of applications, an excellent choice of conservatory style to provide the perfect space for entertaining in style or relaxing in comfort showered in natural light.

With Apple, your bespoke conservatory will be designed with a choice of colours, glazing, doors and roofing options. Constructed from quality materials and expertly installed by our own experienced and highly skilled team.

LEAN-TO STYLE

Contemporary and minimalist, you can enjoy the visual elegance and clean lines of a Lean-To conservatory and personalise your new space with an extensive choice of colours, doors, glazing and roofing options.

This style of conservatory, often referred to as a sun lounge, creates a welcome link between your home and garden. It's an affordable and stylish way to extend your property, creating a versatile space for the whole family.

Expect bespoke design, quality materials and expert installation as standard, with your new conservatory from Apple.

VICTORIAN STYLE

Impressive and versatile, the popular Victorian style conservatory adds extra light, air and grandeur to your home.

The beauty of choosing a Victorian design from Apple is the flexibility that it affords. Available in three or five faceted versions, we can create a bespoke design that perfectly complements the architecture of your home and surrounding space.

Inspired by the ornate design of the Victorian era, your new conservatory will be custom built by expert craftsman using quality materials creating eye-catching exterior features with a light, fresh, interior from where you can enjoy the panoramic vista that this classic style provides.

EDWARDIAN STYLE

A stunning, yet practical conservatory design, suiting both modern and period properties that is ideal for creating the perfect space for entertaining or relaxing.

A square, flat fronted projection presents a dignified simplicity and elegance that blends easily into the character of your home while maximising floor space affording greater versatility of use.

Our Edwardian style conservatories are finished to the highest standards including decorative crestings and finials for the roof, an extensive choice of features along with high-quality engineering, ensuring that you can enjoy your beautiful conservatory for many years.

HYBRIDS

TRANSFORM YOUR LIVING SPACE

RESPONDING TO CONSUMER DEMAND

Consumers increasingly demand high performance conservatory solutions to suit modern lifestyle needs. It is no longer acceptable that such an important investment be unuseable for nine months of the year due to excessively warm or cold conditions. A recent consumer study showed that the two most important considerations when buying a conservatory were; thermal insulation and solar control. For this reason Apple offer a range of Thermally Efficient Polycarbonate roofs, Self Cleaning Thermally Efficient Glass Roofs as well as traditional Solid Roof options for all our conservatories and orangeries.

LET THERE BE LIGHT

CONSERVATORIES – BRINGING THE OUTSIDE IN.

A conservatory is more than just an extension to your house. It can be somewhere to enjoy the peace and tranquillity of the garden, whatever the weather. A place to entertain in, or an extra space for the children to play in. But whatever the reason for adding a conservatory to your home, it is a significant investment, and choosing the right type, style and options will only add to its value.

TOO HOT IN SUMMER OR TOO COLD IN THE WINTER? WITH AN APPLE HYBRID CONSERVATORY ROOF WE CAN REPLACE YOUR EXISTING ROOF OR BUILD ANEW

STYLISH ROOF TILES

LIGHTWEIGHT REPLACEMENT CONSERVATORY ROOF

Apple tiled conservatory roof converts your conservatory into a useable all year round sun-porch with amazing insulating properties.

If you are looking for a high quality tiled conservatory roof then look no further than Apple's Tiled Roof Systems. We have many years of experience and we are specialists in removing old conservatory roofs and replacing them with new, state of the art, lightweight tiled conservatory roofs. This means that they are warm in the winter as the heat loss is reduced.

You can rest assured that an Apple Tiled Conservatory Roof System is cost effective and an ideal solution when you are in need of a new solid conservatory roof. Our friendly team are always on hand to offer guidance and assistance so please give us a call to find out what we can do for you.

One of the most popular finishing options to compliment the Apple roof system are our Roof Vents. These well-designed centre pivot vents allows the sash to

be opened in a range of positions, thus increasing the amount of fresh air which can be drawn into the room. The sash can also be rotated through 180° and locked, allowing easy and safe cleaning of the outer pane to be carried out. Our windows have a much greater surface area when compared with similar sized windows made by other manufacturers. As a result they maximise the amount of natural light in a room.

ADVANTAGES

Incredible U-Value

Our roof gives a u-value of 0.18 that meets total building regulations.

Lightweight Structural Frame

An aluminium fully structural frame with integrated insulation provides a complete roof solution.

Choice of Tile and Slate Colours

Tiles can withstand the most extreme weather conditions giving you total peace of mind.

10 Year Guarantee

All roof components come with a 10 year guarantee as standard and a life expectancy of 60 years on all tiles.

ORANGERIES
FOR EXTRA LIGHT

DIVERSIFY WITH AN APPLE CONSERVATORY OR ORANGERY

Nowadays, the potential uses of a conservatory or orangery are as diverse as the designs available. Some are looking to add extra living space that can be used year round as a dining room, children's playroom, home office or similar, while others are looking to create a seamless, visually connected link between home and garden.

Conservatories and orangeries can offer a bright and airy place to relax and enjoy uninterrupted views of outside whilst maintaining a comfortable inside ambience.

When choosing either, you need to ensure that it will match your own specific lifestyle requirements, it is here that the best choice of glass is essential.

By considering the various options and products that Apple offer, you can create the conservatory or orangery that is perfect for you.

Our roof glass range offers you a choice of four attractive tints all with low maintenance self-cleaning. Each glass tint offers its own combination of solar control and glare reduction properties as well as an individual character to suit your home.

With Apple's wall glass and various glass or solid roof options, it is possible to obtain the ultimate combination of a cooler summer environment and a warm, cosy space during winter months.

With Apple, your conservatory or orangery will be comfortable, will cost less to heat or cool, and will stay cleaner for longer.

WOW

APPLE'S QUALITY WINDOWS

UNDERSTATED STYLE, SUPERIOR PERFORMANCE

A casement window is the name we give to the typical style of UPVC windows you'll find in homes across the UK. It is hinged at the top or the side, and swings either outwards or inwards. Its sleek, simple design makes it suitable for most types of property. As well as optimising the natural light in your home, our UPVC double-glazed windows come with an A+ energy efficiency rating to help reduce your heating costs.

UPVC CASEMENT WINDOW BENEFITS:

Choice of styles and combinations
Top-hung or side-hung to match your preferences.

DECORATIVE FEATURES AVAILABLE

Options to personalize the look for your home.

SIZES AND COLOURS TO SUIT
A range of combinations and colours to choose from.

DRAUGHT REDUCTION
Multi-chambered frame keeps cold out and warmth in.

A+ RATED ENERGY EFFICIENCY
Designed to reduce household heat loss.

HIGH SECURITY BUILT-IN
Multi-point lock technology and frames with internal beads.

MAXIMUM VENTILATION
Designed to enable air to circulate constantly.

WINDOWS WITH CLASS

A REVOLUTION IN DESIGN, ENGINEERING AND PERFORMANCE

Replacing your windows and doors is a big investment, so it's important you have complete confidence in the product you choose. Apple delivers that peace of mind, and much more. We're proud to say it is one of the most advanced UPVC window and door systems available on the market today. As well as cutting-edge design, it has the best energy efficiency ratings of any window you'll find on the market.

BENEFITS OF HERITAGE WINDOWS
Sleek, contemporary lines Cutting-edge design to enhance your home

THREE SASH OPTIONS

Available in standard, slim rebate and fully flush options

30+ COLOURS AND FINISHES

Find the ideal design and colour to suit your scheme

IT LOOKS AS GOOD AS IT PERFORMS

With its sleek, contemporary lines, Heritage is an attractive addition to any home – and a sure way to boost its kerb appeal. There are eight different styles of UPVC window and door to choose from, including three sashes, French doors and tilt and turn windows, with over 30 colours and finishes, you're sure to find the perfect match for your scheme.

WHEN WHITE'S NOT RIGHT

Fashions change. That's why we offer a wide range of colours to suit most tastes. All colours are available with a white internal finish as standard. Colour both sides is an option. And for those looking for something special, there's the Architectural Range – a selection of subtle metallic and premium woodgrain finishes to provide an extra touch of class.

SEE THE APPLE
DIFFERENCE

SASH
WINDOWS

APPLE ARE RENOWNED FOR SUPPLYING AND FITTING THE UK'S LEADING UPVC SASH WINDOWS.

Our sash window is perfect for modern and new-build projects. Offering all the advantages of a modern window, including energy efficiency, ease of use, low maintenance, security – with the classic looks of a sash window, it's sure to enhance any property. It combines the eye-catching appeal of a quality sash window with a host of cutting-edge design features that make the most of modern materials and techniques. Charismatic features of this window are its Victorian sculptured profiles and enhanced security features, which include a unique anti-jemmy bar as standard. Overall this window provides the perfect balance between competitive pricing, period looks and modern features.

HERITAGE

TREAT YOURSELF TO OUR PREMIUM WINDOW SYSTEM

Apple are proud to be able to supply and install the window the whole industry are talking about:

Heritage is a premium window system designed to replicate the 19th Century Flush Sash Timber Window. It can be considered for use in Conservation Areas due to its authentic appearance. This authentic design is also appealing to any homeowner who wants a top end luxury window brand.

Heritage is designed to replicate the flush sash designs found in cottage properties in our villages. It enables you to replace your window with an authentic design and in authentic colours, without losing the character, appearance and feel of the period. Crucially, you can now achieve this in a virtually maintenance free composite material.

With your Heritage window, you can specify traditional Butt Hinges to maintain original features. Modern windows often lack this character as the hinges are hidden. The authentic ironmongery is crucial to maintaining an authentic kerbside appearance.

You can personalise your Heritage windows with a choice of handles. The Monkeytail and Peardrop designs were popular designs of the period.

If your room is more contemporary you can also specify more modern finishes like Chrome, Brass or a Gorgeous Pewter Patina.

Old timber windows often had a raised moulding that ran horizontally across the transom. This bar looked distinctive and gave the window depth and character. Its function was to shed dripping water and to increase the strength. That's why we recreated the feature with Heritage.

Heritage combines contemporary machining processes with carefully hand finished joints to craft a beautiful window, every time - craftsmanship you will find on very few, modern alternatives as they are welded.

It is essential that the handles and peg stays fitted to your cottage windows and are complementary to both the frame itself and the interior of your home. You can choose Black or Pewter Patina in our handmade range. You could also consider the eclectic mix of a traditional Monkeytail shape in a modern Chrome or Brass type finish!

A number of authentic oak finishes and traditional paint colours are available from 'Grained White' to 'Silvered Oak'. Contrasting finishes on the inside and outside are also achievable, if that is what suits your cottage home best.

YOUR DOORWAY
TO BEAUTY

OUR POPULAR UPVC DOORS

UPVC DOORS

Our quality uPVC front doors combine aesthetic appeal with practicality and low maintenance. They are designed for long-life performance, with internal webbing and thick uPVC walls to withstand the rigours of everyday use without denting or scratching.

Apple uPVC front and back doors offer exceptional protection against the elements. Air-tight seals keep out any drafts and effective drainage channels ensure there are no leaks. With excellent thermal efficiency, our doors help you to keep your home warm and minimise energy wastage.

The extensive Apple range will complement your home, as well as providing the durability to withstand everyday use and with a "Secured by Design" accreditation, increase protection against intruders.

OPEN UP TO NEW POSSIBILITIES COMPOSITE DOOR RANGE

COMPOSITE DOORS

The high quality range of composite doors from Apple offer the distinct look and feel of a timber door with all the benefits that superior manufacturing and the finest components provide.

Our composite doors boast outstanding performance in protection against the weather and intruders, tested by the police and awarded "Secured by Design" accreditation. Made with a high density foam core that provides increased strength and a high thermal performance with a Glass Reinforced Plastic (GRP) timber effect finish that is extremely durable and very low maintenance.

With the very best in security, insulation and ascetics our composite doors are amongst the very best on the market today.

Apple Bi-fold doors are the ideal way to open up your home and bring the outside in, whilst still keeping the weather out.

Apple is a leader in the design and manufacture of aluminium sliding and folding doors, delivering outstanding reliability, performance and design every time. Our range of bi-fold doors enables you to expand your living space by opening up wide expanses of your external walls to your outside space. Whilst at the same time keeping the weather out and the heat in during cold months.

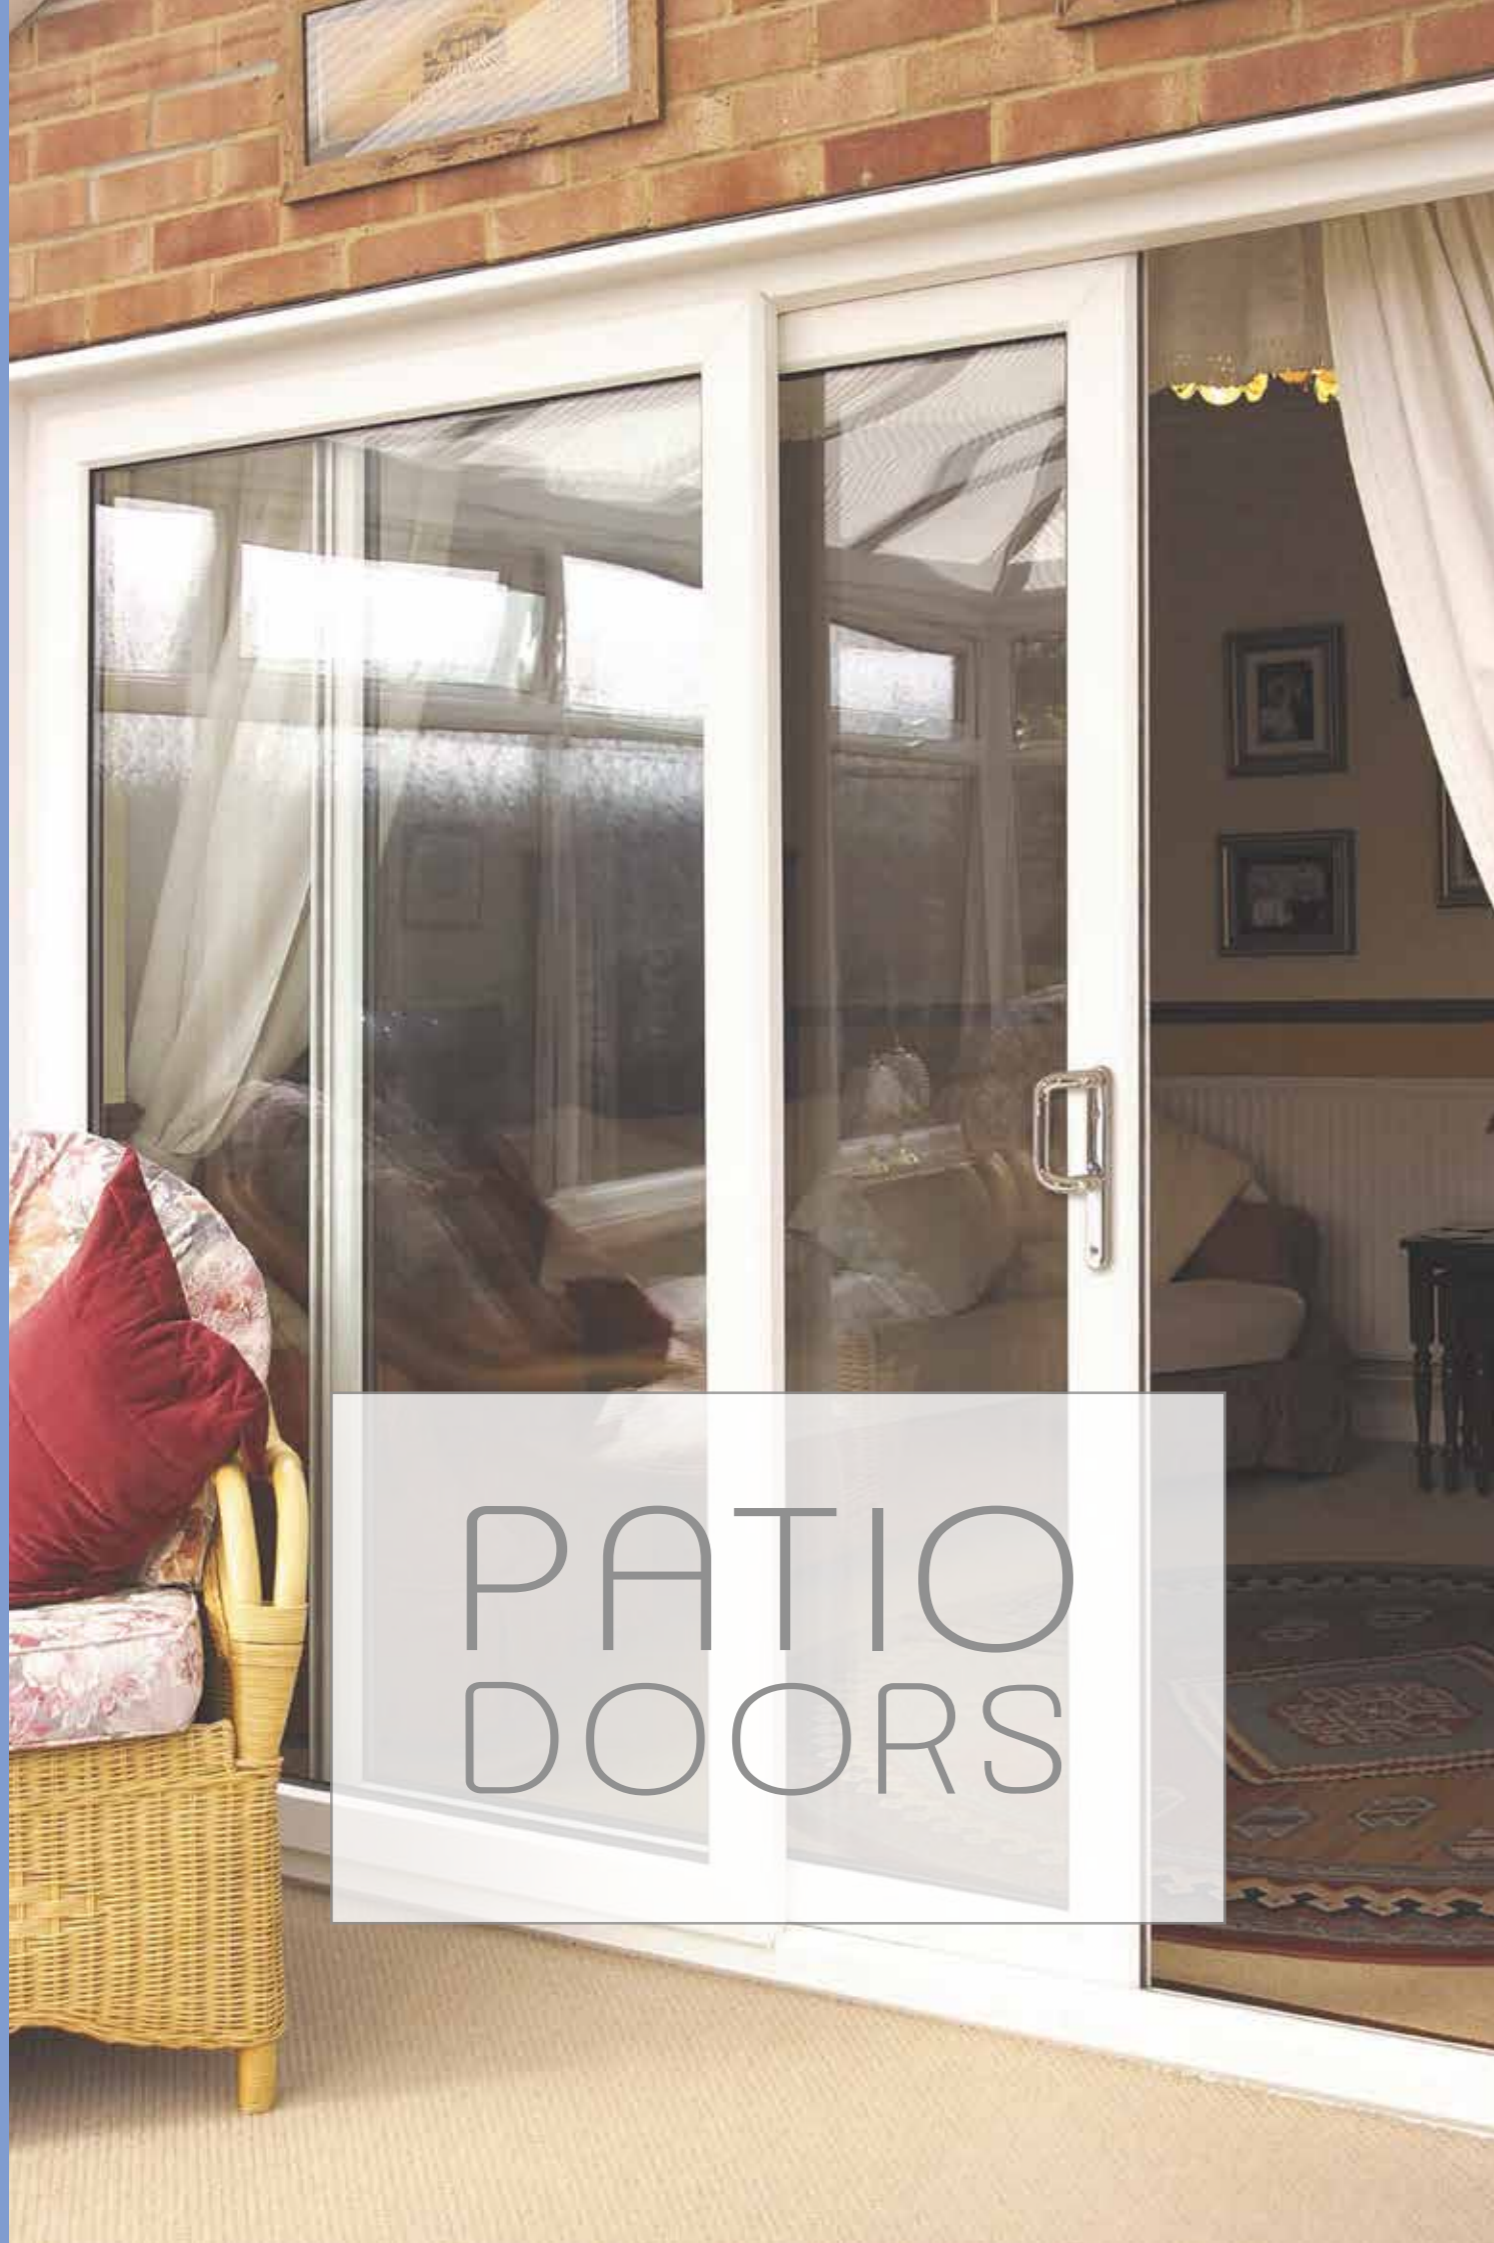

Our stylish but practical bi-fold doors are built to your needs, offering you a bespoke solution every time, from the configuration of the doors to the handles, accessories and colour, making Apple bi-fold doors the perfect addition to your home.

- Wide range of configuration options
- High performance glazing and design

- Sturdy and reliable sliding mechanism
- Low threshold option for room dividers
- High performance as standard
- U-value = 1.7 W/m²K

BI-FOLD

TO FOLD OR NOT TO FOLD

PATIO DOORS

SLIDING PATIO DOORS MANUFACTURED FOR AND SUPPLIED BY APPLE

Welcome to Apple's range of the UK's leading manufacturers patio doors. We're different – we only supply in-line sliding doors and by specialising we've become the experts. We work with our supplier who have a small network of local craftsmen. You get the reassurance of a trusted major brand that can still support the local economy.

STYLE AND STRENGTH

These days, everyone wants light homes and bright, airy spaces. What better way to let more natural daylight in, than with beautifully designed, floor to ceiling, patio doors? Perfect for patios, conservatories and as internal room dividers. They make the most of garden offices, pool houses and porches.

BESPOKE

Every one of Apple's Patio Doors is unique. Precision made in the colours and configuration you require. Choose features, choose your finish and choose hardware – you will always be choosing craftsman built quality.

OUR APPROACH

At Apple, we believe in quality, service and style. We believe that our products should perform brilliantly, year after year, keeping householders warm, safe and secure. We believe that local expertise can't be beaten, but that a recognised and trusted brand is a measure of the strength of our designs, our engineering and our people.

We believe that great patio doors can be home-grown, made in Britain for our weather and for our lifestyles. And we believe in looking after this wonderful planet of ours with low-maintenance, thermally-efficient and recyclable products.

Our reputation for high quality products has enabled us to become one of the UK's leading door suppliers.

What's more, we have a choice of 19 colours and finishes in addition to white, and beautiful Hoppe handles, ensuring each door is unique and suitable for installation in any home or premises.

When choosing patio doors for your home there are many things to consider – how they look, what materials they're made from and how well they tolerate changes

in temperature. But perhaps the first and foremost consideration should always be the level of security they can offer you and your family.

THE PRINCIPLES OF PATIO DOOR SECURITY

Sometimes patio doors are perceived as not being as safe as more traditional types of doors, and this may certainly be the case with some cheaper poorly designed models.

The key to patio door security is in ensuring that the construction of the patio door is sturdy and solid whilst maintaining good functionality and aesthetics, combined with a reliable locking system. That's why we install a six point locking system in all our custom built patio doors, and further reinforce this to prevent intruders from forcing their way in.

We make all our door frames from steel-reinforced PVC-U, designed to be highly attractive yet strong and robust. The glass panes are double-glazed to a thickness of 28mm, further enhancing your patio door security and acting as a deterrent to would-be intruders. Interior sliding panels provide even greater protection.

INBUILT 'ANTI-JACKING' SYSTEM

When buying patio doors it's also important to ensure that there is a system in place to prevent the door panels from being lifted out from the outside. All of our doors contain an inbuilt 'anti-jacking' system which fix the door securely in place and prevent home intruders from using this method to gain entrance.

In terms of patio door security we have left nothing to chance, resulting in a range of doors as secure as they are attractive.

BEAUTIFUL SHUTTERS

BEAUTIFUL WINDOW SHUTTERS

Complete your windows with a touch of elegance with Apple's stylish hand-crafted window shutters.

You can enjoy the elegance that shutters provide while benefiting from a practical solution for maintaining privacy and control natural light that creates exceptional interior design.

A GREAT
SPACE

COMPOSITE DECKING

Instadeck

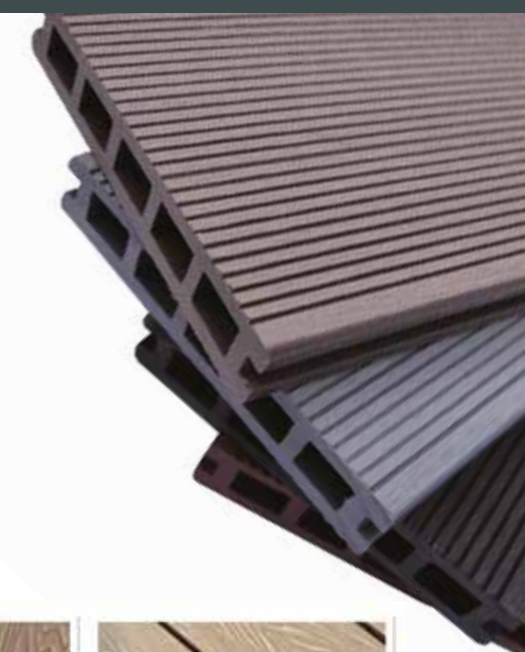

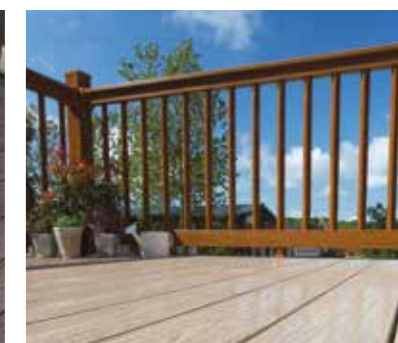

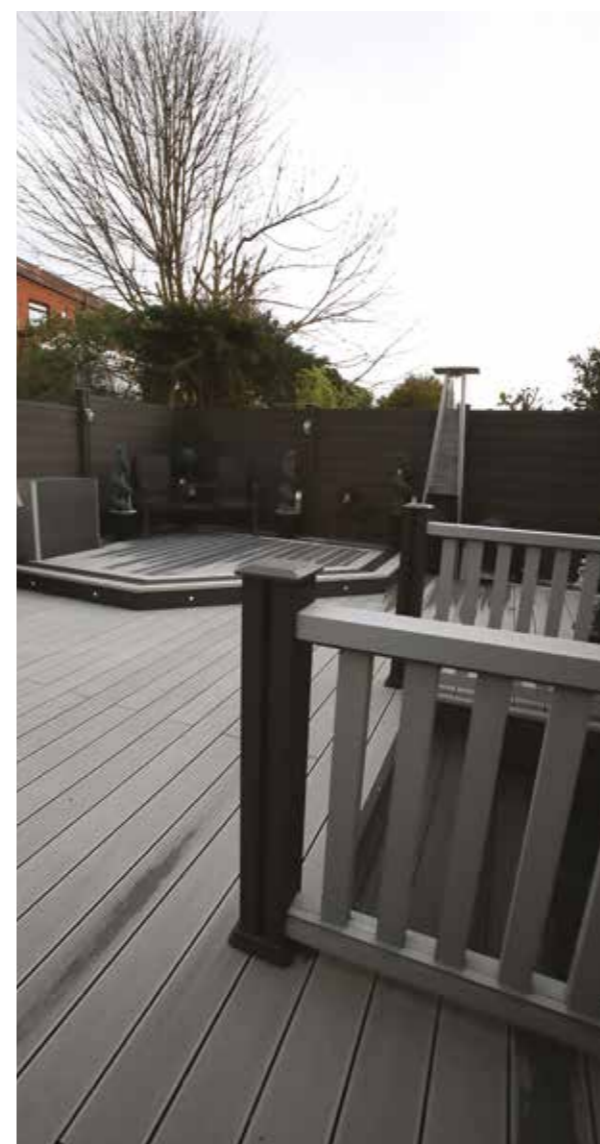

SUPREME OUTDOOR LIVING

We are extremely proud to offer composite decking, this outdoor living product complements many home improvement solutions that we design and expertly install for thousands of customers every year.

Creating a decked area in your garden from composite material as opposed to traditional timber decking has so many advantages. It is not just that the modern composite decking replicates the look and feel of timber with a textured finish, it is easy to clean and stain resistant

MAIN BENEFITS

- Stylish
- Low maintenance
- Strong & durable
- No rot
- Stain resistant
- No warping
- Slip resistant
- 25 year manufacturers warranty

Evafence

FENCING

This fantastic composite fencing solution is an ideal replacement for old and rotting timber fencing, new all round fencing or part of an outdoor living project.

WHY COMPOSITE FENCING?

The key benefits of composite fencing over timber panels are low maintenance and durability. There is no annual painting or weather treating, composite fencing is resistant to mould and algae so you have more time to enjoy your garden rather than spending time on its upkeep.

Composite fencing is very strong and expertly installed to withstand high winds and any knocks from garden sports which can often lead to more maintenance or panel replacement.

QUALITY FENCING

Built to last, your new fence will be there for a long time so this composite fencing is manufactured with a UV stabiliser ensuring your new fence is colour fast and will not fade from sunlight.

Our quality fencing includes a 25 year manufacturers warranty!

MAIN BENEFITS

- Stylish and modern
- Low maintenance
- Strong & durable
- No painting
- No fading
- No splinters
- Choice of colours
- 25 year manufacturers warranty

COMPOSITE FENCING

RESIN DRIVEWAYS

RESIN DRIVES

Create a beautiful and stylish driveway for your home! resin driveways are made from specially selected stones including marble, quarts and aggregates mixed with polyurethane resin to form a fantastic material that not only looks great but is highly practical.

With a choice of different finishes, your stunning driveway is perfectly laid by our expert installers by hand to create a smooth, non slip and seamless finish. The resin driveway, when set, will be extremely durable, low maintenance and permeable, alleviating puddle formation.

Your new resin driveway will be guaranteed for 10 years but expect it to be going strong for many years after that.

BENEFITS

- Low maintenance
- 10 year guarantee
- UV resistant
- Variety of stone finishes
- Non slip - no loose stones
- Hard wearing
- Non fading
- Environmentally friendly
- Planning compliant
- Permeable

GARAGE DOORS

GARAGE DOORS

Your new garage door from Apple Home Improvements is selected from our range of styles, made to measure for a perfect fit, finished with one of our selection of fantastic colours and will be expertly installed by our team.

Our expert advisers are on hand to help select and design your new garage door to the correct specification and ensure that the finished product complements your home perfectly.

BENEFITS

- High quality
- 10 year guarantee
- Variety of colours
- Range of styles
- Thermally insulated
- Secured by design

FIRST IMPRESSIONS COUNT

HASSLE-FREE, LOW MAINTENANCE ROOFLINE SOLUTIONS

With any home improvement project, it's important to get the foundations right. Making sure the exterior of your home is fully protected against the elements is just as important as looking after the interior. Fascias, soffits and gutters may not grab the headlines design-wise, but they play a crucial role in protecting your home from damage.

Fascias, soffits and associated roofline products are essential components for any property. Exposed to the elements, they play a crucial role in protecting the roof space and rafters of your home. They may go unnoticed most of the time, but old, rotten or discoloured timber fascias and soffits can spoil the look of your property and cause expensive damage to your roof rafters.

Roofline components need to be durable, weather-resistant, attractive and – due to their difficult-to-access location – low maintenance. PVC-U roofline products meet and exceed all of these requirements.

COMPLETE PVC-U ROOFLINE SYSTEMS

We offer everything you need for a complete, high-performance roofline system, manufactured to the highest quality standards. From fascias, soffits and guttering to dry verge, over-fascia ventilation and all the essential trims and accessories – we can install a roofline system that will really enhance your home.

COLOUR-MATCH AND QUALITY GUARANTEED

All our roofline systems are supplied by the same manufacturer, which means all colours are exactly matched across the product range. That means our whites are the same white across all products and our woodgrain finishes are all perfectly matched. Our roofline products also carry guarantees of up to 20 years against discolouration, warping and cracking.

WHY CHOOSE PVC-U ROOFLINE?

The hassle-free way to preserve your roof and enhance your home.

AESTHETIC APPEAL

PVC-U fascias, soffits and roof trims will brighten up your property, giving it a fresh new lease of life. All roofline products are available in a range of colours and woodgrain finishes to suit individual property styles and personal tastes. You can also choose plain flat boards for a simple, contemporary look, or sculpted 'ogee' style options for a more decorative finish.

LOW MAINTENANCE FOR LIFE

PVC-U fascias, soffits and other roof trims require very little maintenance an occasional wipe clean with a damp cloth is enough to keep your fascias and soffits looking as good as new, for life.

PVC-U products will not rot, crack or warp and will remain a long-term, maintenance-free asset to your property.

NO PAINTING

Long-life performance: PVC-U roofline products require no sanding, painting or treatment – ever. Installation is clean and hassle-free, with no dust or mess. Your fascias and soffits will retain their appearance and performance without the need for any preservative treatments.

White PVC-U roofline products come with a manufacturer's 20-year guarantee against discolouration, warping and cracking. Coloured, laminated boards carry a ten-year colour-fastness guarantee.

THE APPLE CANOPY, VERANDA AND CARPORT

We have vast experience in selling and installing carports, canopies and verandas, this has enabled us to source a flexible, quality range of canopies.

Our aim is to provide a quality canopy, in a wide range of readily available sizes, that is also flexible enough to meet the specific needs of each customer.

CANOPY DESIGN

The component design has been sought to provide an aesthetically pleasing, practical and structurally robust structure. The canopy has been designed from scratch so that it is a fully integrated design.

- The structural framework is constructed from extruded structural T6 aluminium and powder coated to provide long-lasting robust components
- The structural aluminium frame is powder-coated in polyester and is available in (2) colours: White (Hipca White) and Brown (RAL8016 – Mahogany Brown)
- Lean-To Canopies project upto 4.5m
- The Integrated gutter can be connected to existing rainwater guttering/downpipes
- The canopy can be powder coated in any colour required if specified
- The roof panels are made from 16mm thick structural polycarbonate
This is available in 3 colours; clear, bronze and opal
- The roof panels can be supplied with:
Glass Clear Plate Polycarbonate panels
6mm Toughened Glass

DESIGN FEATURES:

- Integral eaves/gutter
- Variable pitch
- Structural bracket
- Supporting Post base fixing
- Free-Standing canopies project upto 7.0m

CLADDING

PROTECT YOUR HOUSE FROM THE ELEMENTS

PVC cladding is the perfect way to protect your property from the elements, increase its value, protect it from the elements and improve its appearance. It also reduces the cost of painting/maintenance of your property.

INSULATE YOUR HOME

APPLE High Density Insulation

Apple Roof Insulation's rigid foam system is uniquely manufactured to Government approved specification. It is the most effective form of loft insulation available today due to its 90% closed-cell construction.

- Solves leaking roofs
- Creates useable loft
- Strengthens roofs
- Protects your property
- Excellent insulation
- Save on heating bills

As easy as 1, 2, 3...

1. Retain your roof
The foam seals leaking roofs, guaranteeing maintenance free living for 10 years, all at a fraction of the cost of re-roofing.
2. Insulate your roof
Dramatically reduce your heating bills and permanently eliminate freezing pipes.
3. Increase your home's value
Create a valuable extra room and add value to your home.

Solve roofing problems

There are many problems that can occur with roofs over time, our spray foam insulation system can help solve these issues

- Leaks around flashing, old or badly fitted lead flashings in roof valleys or around chimneys can be a major cause of water ingress.
- Damaged Roof Felt
When the felt on the underside of the tiles is damaged, water can leak through, our foam insulation seals the underside of the tiles and prevents water seeping through.
- Shaling of tiles
The surface of the tile can erode, which can lead to them breaking up, polyurethane foam seals the underside of the roof to prevent water ingress, guaranteed leak free for 10 years.

Before Apple High Density Insulation

The benefits of spray foam insulation

After our installers have finished repairing and applying the roof insulation, you will enjoy the following benefits:

- Lower heating bills
With the excellent insulation properties of our spray foam, your roof will help you lower your heating bills by retaining more warmth in your home.
- A clean, useable loft space
The spray insulation seals the roof and helps stop dirt and dust falling into the loft. This leaves your loft cleaner, with many customers using the loft as a practical space, not just for storing boxes.
- No more roof worries
As your roof is strengthened and bonded by the spray foam, you can rest assured that the likelihood of typical roofing problems has been removed, we also guarantee your roof for 10 years.

iFOAM PLUS

Even greater insulation and increased sound proofing can be achieved with our open cell spray foam solution. Ideal for projects that do not require additional strengthening or weatherproofing and where maximum insulation or noise reduction is the primary objective.

APPLE HEATING

APPLE ALPHA DELTA HEATING SYSTEM

Apple Alpha Delta is the result of years of research and development, dedicated exclusively to achieving the world's most advanced home automation system for heating and hot water.

Control your heating from your mobile device!

WIRELESS CONTROL OF YOUR HEATING

The unique advanced Apple Alpha Delta with E-Life technology allows wireless control and direct management of your heating and hot water via WIFI, over the Internet.

The INSIDE WIFI module built into all products in the Alpha Delta range allows control of all functions remotely through the Connect App application from your tablet or smartphone, without accessories or intermediate terminals.

In addition, exclusive electronic Extra Low Power microcontrollers XLP8 and XLP16 with Fuzzy Logic Energy Control ensure maximum thermal comfort with minimum energy consumption.

HOW DOES IT WORK?

Fuzzy Logic Energy Control predicts the quantity of power required in each moment until reaching the temperature set by the user.

This technology proportionally reduces the electric power necessary to reach the desired temperature by softening the initial curve, reducing the temperature peaks and, thanks to the multiple stop-starts occurring during the stable period that follows, it favours a greater temperature stabilisation.

Apple Alpha Delta and Alpha Kyros heating with the Fuzzy Logic Energy Control technology decrease the equivalent ratio of consumption by up to 6%* compared with those that incorporate the Optimiser Energy Plus technology.

APPLE ALPHA KYROS HEATING SYSTEM

Apple Alpha Kyros provides the user with a complete low consumption digital integral system with the maximum quality guarantee in all of the elements with which it is made. Thanks to the advanced Fuzzy Logic Energy Control technology, you can enjoy comfort and wellbeing with reduced consumption.

The Apple Alpha Kyros heating system has 110 watts per element to provide a balanced heat transfer compared to other heating systems that have between 125 & 160 watts per element. With this balance, each element of the radiator will heat approximately 1 m² in an extra cold area within the United Kingdom.

The aluminium elements which make up the Apple Alpha Kyros radiators have been designed to provide maximum heat dissipation through natural air convection, maintaining relative humidity within comfort limits.

FUZZY LOGIC ENERGY CONTROL

Fuzzy Logic Energy Control is a new and significant development introduced by the R&D department that represents a considerable technological advance to heating and hot water products. The patented Fuzzy Logic Energy Control technology is a natural evolution from its predecessor Optimiser Energy Plus.

It administers the product start up more quickly and efficiently thanks to a more precise control over the calculation of the power requirement required to reach the established temperature.

A PERFECT FIT FOR CONSERVATORIES

BOILER REPLACEMENT

COMBI BOILERS

The most popular type of boiler. A combi boiler only heats water when you need it, running the hot tap or when your shower is being used, providing maximum efficiency. Hot water flows to your taps at the pressure of your mains supply, so you can enjoy a hot powerful shower without the need for a pump.

SYSTEM BOILERS

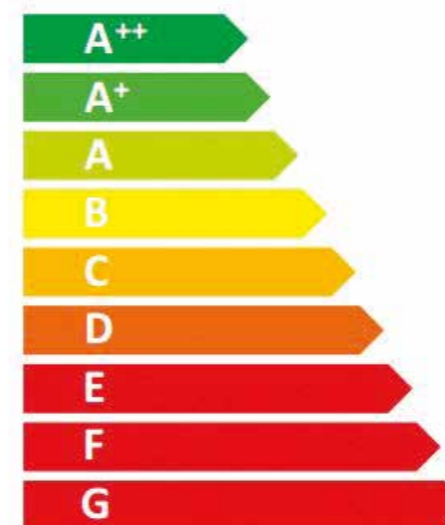

For households that require more available hot water to cater for multiple bathrooms and central heating a system boiler could be the perfect choice. The system boiler provides hot water to your taps and feeds your radiators via a pump. Hot water stored in a sealed storage cylinder. System boilers are reliable, versatile and highly efficient.

ENERGY EFFICIENCY

Our range of Apple boilers are extremely efficient with a Band A energy efficiency rating, producing more usable heat from the amount of gas used compared to your old boiler, replacing your old boiler will save you money on your bill, save on maintenance and reduce your carbon footprint.

- RELIABLE
- CONVENIENT
- A RATED ENERGY EFFICIENCY
- NEST & SMART CONTROLS
- 10 YEAR GUARANTEE

APPLE BOILERS

A

RADIATOR REPLACEMENT

Quality range of high performance radiators with precision welded convectors for greater efficiency and economy. Compact and stylish our radiators are available in a range of sizes with a high quality, durable finish.

NEST

NEST CONTROL

A thermostat that learns and adapts to your life. After just one week the Nest Thermostat learns your heating habits and then it programs itself. By this time the Nest system knows what time of day you like the house temperature to be and with its built in sensors Nest even knows when you're away or at work, then it turns to auto-way to save you energy.

YOU'RE ALWAYS IN CONTROL WITH NEST

You have the freedom to control your home temperature from your mobile phone, for example if you're heading home early from work you can set the heating to the desired temperature for when you arrive home. Plus Nest allows you to control your hot water tank, giving you extra hot water if you need it. You can also add more Nest products that work together in your home e.g. Nest Cam, Nest Protect smoke alarm and LIFX lighting.

TRUSTED APPLE INSTALLATION

IN A RECENT SURVEY

95%OF THIEVES WOULD AVOID
YOUR PROPERTY IF AN
ALARM WAS INSTALLED

Don't wait! Call Apple today and protect your home with extra security and piece of mind.

PROTECTING YOUR HOME

Your home is your castle and protecting your possessions and your family has become increasingly necessary in a world where would be thieves target your worldly possessions, from jewellery, electricals and sentimental objects of importance. At Apple, we understand that it's not just the cost of the items that you lose, but also the potential psychological effect it can have on you and your family, knowing that an intruder has entered the safety of your home.

By installing an Apple security alarm, you can rest assured that your home becomes a less desirable option for thieves. It can deter criminals while you are away on holiday and can alert you to intruders that may try to enter your home while you are sleeping at night.

In a recent survey with former criminals they said that an installed alarm was a deterrent and they would avoid your property.

Installing an alarm will not guarantee that a theft will not occur, but for extra piece of mind the benefits out-way the risks and our alarms are a cost-effective way to help protect your property.

APPLE DEFENDER – STATE OF THE ART HOME SECURITY SYSTEM

- Can be used for up to 30 zones of protection.
- Highly secure encrypted web browser, for mobile and tablet friendly interface
- Meets the professional alarm installation standards
- Can be used with up to 4 cameras
- Provides uncompromised protection for your home.

I have always found this company easy ...

I have always found this company easy and good to deal with. The three installations they have done for me in the last few years have been done on time and with the minimum disruption. The teams who have carried out the work have been friendly and as far as I can tell competent. I would not hesitate to use them again in the future.

Ace Apple

We have used 'Apple ' before and been pleased with their work so much so we have bought other products from them. Our latest installation of a window and glass replacement was undertaken professionally, efficiently and without any mess or problems. The men were friendly and worked hard to make the installation go without a hitch. We continue to be impressed by their service and know that on previous occasion when we have had a problem they have responded quickly to resolve any issues.No problems this time and would trust them to do any future work we need.

Well known local company who understand ...

Well known local company who understand customer's needs and present an extremely attractive product in a professional manner. Their installation team was extremely capable and efficient. We appreciated the various methods of payment that were offered. Not only is there the Company's guarantee but also guarantees operative through third parties if there is a difficulty with Apple.
